

Journal manuscript for testing

Abstract

Lorem ipsum dolor sit amet, consetetur sadipscing elitr, sed diam nonumy eirmod tempor invidunt ut labore et dolore magna aliquyam erat, sed diam voluptua.

Keywords

Keyword 1, keyword 2, keyword 3

1. Introduction

The introduction sets the stage for this research, addressing the gap in current knowledge and the significance of the study. It outlines the objectives, hypotheses, and the overall framework that guides the investigation. The literature review provides context for the research questions, building a foundation for the subsequent sections.

2. Methods

The methods section details the experimental design, data collection procedures, and analytical techniques employed in this research. Ethical considerations and participant recruitment strategies are addressed, ensuring transparency and replicability. This section provides a comprehensive overview of the systematic approach used to answer the research questions ¹.

Table 1 My Simple table

A	B	C
123	456	789

Table 2 My Complex table

		Electromagnetic unit	Triboelectric unit	
			Single-electrode mode	Contact-separation mode
Open-circuit voltage	AC	56 mV	217 mV	325 mV
	DC	100 mV	400 mV	600 mV
Short-circuit current		117 μA	240 nA	370 nA
		Middle A	Middle B	Middle C
Internal resistance		500 Ω	800 KΩ	1 MΩ
Peak power density		16.2 μW/cm ²	1.3 μW/cm ²	2.4 μW/cm ²

3. Discussion

Funding statement

This research was made possible through the generous support of the Lorem Ipsum Foundation, acknowledging their commitment to advancing scientific knowledge. Grant LI-123456 provided essential resources for project implementation, covering expenses related to data acquisition, analysis tools, and dissemination activities. The funders played no role in the study design but played a crucial role in facilitating the research's execution and its subsequent contributions to the academic community.

Conflicts of interest

The authors declare no conflicts of interest that could influence the interpretation of the research findings. None of the authors have financial or personal relationships with organizations or individuals that might have biased the work inappropriately. This includes, but is not limited to, employment, consultancies, honoraria, and any form of financial or non-financial relationships. The manuscript has been reviewed and approved by all authors, who confirm their adherence to ethical standards and transparency regarding potential conflicts of interest associated with this research.
